

## How is Southport Smiles helping to stop the spread of Covid-19?

We have always operated under the presumption that every patient may have a contagious infectious disease. We thoroughly disinfect every treatment room between each patient with medical grade disinfectants in alignment with protocol set forth by the CDC.

### With new concerns associated with Covid-19, we have implemented the following:

1. Medical grade air filters in each treatment room and the reception
2. Social distancing in our reception area- If you prefer to wait in your car, please call the office upon your arrival and request to do so.
3. Frequent disinfecting of the restroom, all door handles, credit card readers, and the reception
4. Plexiglass shields installed in reception area.

Please call to reschedule your appointment if you are experiencing sore throat, cough, fever, loss of taste or smell, or known exposure to a Covid-19 patient within the last 14 days.

\*\*\* If you have a mask of any type available, we do ask you to wear it to and from your appointment. \*\*\*

Your provider will be receiving you with **PPE** in place, so please pardon the fact that our masks will cover our friendly SMILES- but trust us, happy faces are under those masks!

We are so happy to continue the quality care you have come to expect!

**Dr Zubia and Team**
